

Contractor: Mr George Shiels

Housing Type: 2 individual architect designed homes

Project Size: 23 windows and 3 doors per plot

Product Specification: All windows are fully reversible with dummy transoms to resemble mock sash and case in cherry oak both sides, complimented by cherry oak residential doors

Measured Benefit: The architect and the client both wanted products that would look outstanding against both natural stone and render finish. This was achieved by using Sideys Solartherm products.

Duration: All products were delivered complete to site within 3 weeks from point of order

Complexity: Ensuring compliance with the clients and architects wishes and specification and ensuring all products complied fully with the latest building, cleaning and fire escape regulations.
